

Using Airprint

Print directly from your Apple device to your bizhub copier.

What to know before you start:

Airprint will only work with apple products and you have to be logged on to Wi-Fi that is on same network segment as copier.

Airprint cannot be used if user authentication or account track is enabled on your copier.

Airprint is not same thing as Bluetooth.

To Activate On Your i-Series Copier

Note: i-Series Copiers ONLY

- Touch **Home** button
- Select **Utility** on screen
- Select **Admin** and key in admin code **1,2,3,4,5,6,7,8 - OK**
- Select **Network**
- Select **Air Print Settings**
- Select **Print Settings - turn on**
- Select **OK** touch **Home** button

To Activate On Your Non-i-Series Copier
